

PUBLICATIONS

by Robert A. Shaw

1. Ultra-violet absorption spectra of 9-substituted fluorenes. C. Eaborn and R. A. Shaw. *J. Chem. Soc.*, **1954**, 2027-2030.
2. Organosilicon compounds. Part XII. Substituted 9-fluorenyltrimethyl-silanes. C. Eaborn and R. A. Shaw. *J. Chem. Soc.*, **1955**, 1420-1425.
3. Organosilicon compounds derived by substitution at reactive carbon-hydrogen bonds. R. A. Shaw. Thesis approved for the degree of Ph.D. by University of London, **1955**.
4. Organosilicon compounds. Part XV. Derivatives of α - and γ - Picoline. C. Eaborn and R. A. Shaw. *J. Chem. Soc.*, **1955**, 3306-3308.
5. Compounds of silicon. Part 1. Silicon derivatives of β -amino- α : γ - diphenylcrotononitrile. R. A. Shaw. *J. Chem. Soc.*, **1957**, 2779-2784.
6. Compounds of silicon. Part II. The reaction of silicon halides with diazoalkanes. R. A. Shaw. *J. Chem. Soc.*, **1957**, 2831-2833.
7. Compounds of silicon. Part III. Competitive reactions of chloro-, bromo-, and iodo-triethylsilanes with phenol. R. A. Shaw. *J. Chem. Soc.*, **1958**, 521-522.
8. Isomeric phenyl derivatives of the phosphonitrilic chlorides. R. A. Shaw and C. Stratton. *Chem. and Ind.*, **1959**, 52.
9. Infrared absorption spectra of trimeric and tetrameric phosphonitrilic halide derivatives. R. A. Shaw. *Chem. and Ind.*, **1959**, 54.
10. Primary and secondary alkylamino-derivatives of trimeric phosphonitrilic chloride. S. K. Ray and R. A. Shaw. *Chem. and Ind.*, **1959**, 53.
11. Phosphonitrilic halides. R. A. Shaw. *Chem. and Ind.*, **1959**, 412-416.
12. Bromophosphazenes (Phosphonitrilic bromides). N. E. Bean and R. A. Shaw. *Chem. and Ind.*, **1960**, 1189.
13. Phenyl derivatives of cyclotriphosphazatriene (Phenyltriphosphonitriles). F.B.G. Wells and R. A. Shaw. *Chem. And Ind.*, **1960**, 1189-1190.
14. Report on the IUPAC symposium on macromolecules. R. A. Shaw. *Chem. and Ind.*, **1960**, 193.
15. Inorganic polymers. R. A. Shaw. *New Scientist*, **1960**, 8, 1603-1605.
16. Phosphorus-Nitrogen Compounds. Part I. Alkylamino- and dialkylamino- derivatives of cyclotriphosphazatriene. S.K. Ray and R. A. Shaw. *J. Chem. Soc.*, **1961**, 872-878.

17. Alkoxy- and aryloxy-phosphazenes (Phosphonitrilic alkoxides and aryloxides). B. W. Fitzsimmons and R. A. Shaw. *Chem. and Ind.*, **1961**, 109.
18. Inorganic Polymers. R.A. Shaw. McGraw-Hill Encyclopaedia of Science and Technology, 2nd Edition, **1966**, vol. 10, 475-476.
19. Developments in the chemistry of boron compounds. R. A. Shaw. *Industrial Chemist*, **1961**, 335-338.
20. High polymers and their intermediates in the phosphonitrilic halide system. R. A. Shaw. *J. Polym. Sci.*, **1961**, 50, 21-30.
21. Hydrochlorides of some aminophosphazenes (Phosphonitrilic amides). S. K. Ray and R. A. Shaw. *Chem. and Ind.*, **1961**, 1173.
22. A rearrangement of some alkoxyphosphazenes. B. W. Fitzsimmons and R. Shaw. *Proc. Chem. Soc.*, **1961**, 258.
23. Inorganic Polymers. R. A. Shaw. S.C.I. Monograph No. 13, High Temperature resistance and thermal degradation of polymers. **1961**, 24-41.
24. Selected topics from the International Symposium on Inorganic Polymers Nottingham University, 18-21 July. R. A. Shaw. *New Scientist*, **61**, 11, 355.
25. The present state of inorganic polymers. R. A. Shaw. *Industrial Chemist*, **1961**,
26. Dimeric phosphinoborane derivatives. W. Gee, R. A. Shaw, B. C. Smith and G. J. Bullen. *Proc. Chem. Soc.*, **1961**, 432.
27. Basicity of some aminophosphazenes. D. Feakins, W. A. Last and R. A. Shaw. *Chem. and Ind.* **1962**, 510-511.
28. 1,3,5-Triazines. Part 1. The reaction of cyanuric chloride with NN-diethylaniline. R. C. Galesworthy, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1962**, 1507-1508.
29. The phosphazenes (Phosphonitrilic compounds). R. A. Shaw, B. W. Fitzsimmons and B. C. Smith. *Chem. Rev.*, **1962**, 62, 247-281.
30. 1,3,5-Triazines. Part II. The reaction of acid chlorides with triphenyl phosphite. W. Hewertson, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1962**, 3267-3268.
31. Conversion of alkoxyphosphazenes into 1,3,5-triazines. B. W. Fitzsimmons, C. Hewlett and R. A. Shaw. *Proc. Chem. Soc.*, **1962**, 340.
32. Mercaptophosphazenes. A. P. Carroll and R. A. Shaw. *Chem. and Ind.*, **1962**, 1908-1909.
33. The Seventh International Conference on Co-ordination Chemistry. R. A. Shaw. *Industrial Chemist*, **1962**, 501-504.

34. Reactions of sulphoxides with phosphorus compounds and reactive organic halides. S. K. Ray, R. A. Shaw and B. C. Smith. *Nature*, **1962**, 196, 372.
35. Phosphorus-Nitrogen Compounds. Part II. Non-geminal Phenylchlorocyclophosphazenes from the reaction of phenyltetrachlorophosphorane and ammonium chloride. R. A. Shaw and C. Stratton. *J. Chem. Soc.*, **1962**, 5004-5009.
36. The kinetics and mechanism of the reaction of hexachlorocyclotriphosphazatriene with piperidine in toluene. B. Capon, K. Hills and R. A. Shaw. *Proc. Chem. Soc.*, **1962**, 390.
37. Co-ordination chemistry of the platinum metals. R. A. Shaw. *Platinum Metal Review*, **1963**, 7, 12-14.
38. Basicities and structural effects in phosphazene derivatives. D. Feakins, W. A. Last, N. Neemuchwala and R. A. Shaw. *Chem. and Ind.*, **1963**, 164-165.
39. 1,3,5-Triazines. Part III. Arbuzov reactions of chlorotriazines. W. Hewertson, R. A. Shaw and B. C. Smith. *J. Chem. Soc.* **1963**, 1670-1675.
40. Phosphorus-Nitrogen Compounds. Part III. The phosphams. M. C. Miller and R. A. Shaw. *J. Chem. Soc.*, **1963**, 3233-3236.
41. Phosphorus-Nitrogen Compounds. Part IV. Alkylamino- and dialkylamino-derivatives of cyclotetraphosphazetraene. S. K. Ray, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1963**, 3236-3241.
42. Molecular addition compounds of some phosphazenes and 1,3,5-Triazines. S. K. Das, R. A. Shaw, B. C. Smith and (in part) W. A. Last and F. B. G. Wells. *Chem. and Ind.*, **1963**, 866.
43. Modern Thinking on Organometallic Chemistry. R. A. Shaw, *Ind. Chem.*, **1964**, 40, 17-20.
44. Phosphorus-Nitrogen Compounds. Part V. The Friedel-Crafts arylation of hexachlorocyclotriphosphazatriene. K. G. Acock, R. A. Shaw and F. B. G. Wells. *J. Chem. Soc.*, **1964**, 121-130.
45. Phosphorus-Nitrogen Compounds. Part VI. Alkylamino- and dialkylamino- derivatives of geminal phenylchlorocyclotriphosphazatrienes. K. Hills and R. A. Shaw. *J. Chem. Soc.*, **1964**, 130-137.
46. 1,3,5-Triazines. Part IV. Phosphinotriazines. W. Hewertson, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1964**, 1020-1026.
47. Phosphorus-Nitrogen Compounds. Part VII. Alkoxy- and aryloxy-cyclophosphazenes. B. W. Fitzsimmons and R. A. Shaw. *J. Chem. Soc.*, **1964**, 1735-1741.
48. Thermal condensation polymerisation of inorganic monomers in platinum metal crucibles. M. C. Miller, D. W. Rhys and R. A. Shaw. *Ind. Chem.*, **1964**, 40, 183-187.

49. Phosphazene-1'-ylcyclophosphazatrienes. R. Keat, M. C. Miller and R. A. Shaw. *Proc. Chem. Soc.*, **1964**, 137.
50. The *cis-trans* Isomerisation of some Aminochlorocyclophosphazatrienes. R. Keat and R. A. Shaw. *Chem. and Ind.*, **1964**, 1232.
51. Structure and Basicity. Part 1. General and Experimental Considerations; the Basicity of some Common Bases in Nitrobenzene Solution. D. Feakins, W. A. Last and R. A. Shaw. *J. Chem. Soc.*, **1964**, 2387-2396.
52. Reactions of N-bromosuccinimide with inorganic hydrides. W. Gee, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1964**, 2845-2846.
53. Phosphorus-Boron Compounds. Part 1. Cyclodiphosphinoboranes. W. Gee, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1964**, 4180-4183.
54. Phosphorus-Nitrogen Compounds. Part VIII. The alkoxyphosphazene-oxophosphazane rearrangement. B. W. Fitzsimmons, C. Hewlett and R. A. Shaw. *J. Chem. Soc.*, **1964**, 4459-4464.
55. Structure and Basicity. Part II. The Basicity of Fully Aminolysed Cyclophosphazatrienes and Cyclotetraphosphazetraenes in Nitrobenzene and Water. D. Feakins, W. A. Last and R. A. Shaw. *J. Chem. Soc.*, **1964**, 4464-4471.
56. Phosphorus-Nitrogen Compounds. Part IX. The reaction of dimethylamine with hexachlorocyclophosphazatriene: the replacement pattern and the structure of the products. R. Keat and R. A. Shaw. *J. Chem. Soc.*, **1965**, 2215-2223.
57. Phosphorus-Nitrogen Compounds. Part X. The aluminium chloride catalysed *cis-trans* isomerisation of nongeminal chlorodimethylamino- and chloropiperidino-cyclophosphazatrienes. R. Keat, R. A. Shaw and C. Stratton. *J. Chem. Soc.*, **1965**, 2223-2227.
58. Interrelations between volatilisation curves, elemental composition and total volatiles in carbonaceous chondrites. G. Mueller, R. A. Shaw and Takeshi Ogawa. *Nature*, **1965**, 206, 23-25.
59. Compounds of Silicon. Part IV. Reactions of hexamethyldisilazyl-lithium with chlorosilanes. E. H. Amonoo-Neizer, R. A. Shaw, D.O. Skovlin and B. C. Smith. *J. Chem. Soc.*, **1965**, 2997-2999.
60. Structure and Basicity. Part III. The basicity of homogeneously substituted cyclophosphazatrienes and cyclotetraphosphazetraenes. D. Feakins, W. A. Last, N. Neemuchwala and R. A. Shaw. *J. Chem. Soc.*, **1965**, 2804-2811.
61. Phase Studies and Compound Formation in the Phosphazene and 1,3,5- Triazine Systems. S. K. Das, R. A. Shaw and B. C. Smith. *Chem. Commun.*, **1965**, 176.

62. Phosphorus-Boron Compounds. Part II. The Halogenation of 1,1,3,3,5,5-Hexaphenylcyclotriphosphinoborane. W. Gee, J. B. Holden, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1965**, 3171-3174.
63. Phosphorus-Boron Compounds. Part III. Reaction of white phosphorus with boron tribromide and boron tri-iodide. W. Gee, R. A. Shaw and B. G. Smith. *J. Chem. Soc.*, **1965**, 3354-3357.
64. A ring contraction reaction in phosphazene chemistry. M. Biddlestone and R.A. Shaw. *Chem. Commun.*, **1965**, 205.
65. Phosphorus-Nitrogen Compounds. Part XI. Kinetic investigations of the reactions of chlorocyclophosphazenes with piperidine and diethylamine in toluene. B. Capon, K. Hills and R.A. Shaw. *J. Chem. Soc.*, **1965**, 4059-4066.
66. Phosphorus-Nitrogen Compounds. Part XII. The *cis-trans* isomerisation of non-geminal aminochlorocyclotriphosphazatrienes by substituted ammonium chlorides. R Keat and R. A. Shaw. *J. Chem. Soc.*, **1965**, 4067-4070.
67. Phosphorus-Nitrogen Compounds. Part XIII. Phenoxy- and *p*-bromophenoxy-chlorocyclotriphosphazatrienes. D. Dell, B.W. Fitzsimmons and R. Shaw. *J. Chem. Soc.*, **1965**, 4070-4073.
68. Sulphoxides. Part 1. The oxidation of tervalent phosphorus compounds by Dimethyl Sulphoxide. E. H. Amonoo-Neizer, S. K. Ray, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1965**, 4296-4300.
69. Preparative aspects of Phosphazene Chemistry. R. A. Shaw, R. Keat and C. Hewlett. Chapter I, pp. 1-91, in Vol. II. "*Preparative Inorganic Reactions*". Ed. W. L. Jolly, Interscience, **1965**.
70. Phosphorus-Nitrogen Compounds. Part XIV. The reaction of benzoyl chloride with hexaethoxycyclotriphosphazatriene and octaethoxycyclotetraphosphazetraene. B. W. Fitzsimmons, C. Hewlett and R. A. Shaw. *J. Chem. Soc.*, **1965**, 4799-4802.
71. Phosphorus-Nitrogen Compounds. Part XV. ¹H nuclear magnetic resonance and infrared spectra of some mononuclear phosphorus (v) compounds containing the P-NMe₂ grouping. R. Keat and R. A. Shaw. *J. Chem. Soc.*, **1965**, 4802-4805.
72. Phosphorus-Nitrogen Compounds. Part XVI. The reactions of hexachlorocyclotriphosphazatriene with *t*-butylamine. S. K. Das, R. Keat, R. A. Shaw and B.C. Smith. *J. Chem. Soc.*, **1965**, 5032-5036.
73. 1,3,5-Triazines. Part V. The reactions of cyanuric chloride with *N,N*-dialkyl-anilines, -toluidines, and -xylidines. R. A. Shaw and P. Ward. *J. Chem. Soc.*, **1965**, 5446-5451.
74. 1,3,5-Triazines. Part VI. The reaction of hexamethyldisilazyl-lithium with cyanuric chloride. E. H. Amonoo-Neizer, R. C. Golesworthy, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1965**, 5452-5453.

75. Inorganic Polymers. Part 1. A solid inorganic foam. R. A. Shaw and Takeshi Ogawa. *J. Polymer Sci., Part A*, **1965**, 3, 3343-3351.
76. Sulphoxides. Part II. Reactions of dimethyl sulphoxide with inorganic and organic acid halides. E. H. Amonoo-Neizer, S. K. Ray, R. A. Shaw and B. C. Smith. *J. Chem. Soc.*, **1965**, 6250-6252.
77. Inorganic Polymers. Part II. The thermal bulk condensation polymerization of *P*-phenylphosphonic diamide. R. A. Shaw and Takeshi Ogawa. *J. Polymer Sci., Part A*, **1965**, 3, 3865-3876.
78. Phosphorus-Nitrogen Compounds. Part XVII. The ^1H and ^{31}P nuclear magnetic resonance spectra of dimethylamino-derivatives of hexachlorocyclotriphosphazatriene. R. Keat, S. K. Ray and R. A. Shaw. *J. Chem. Soc.*, **1965**, 7193-7198.
79. Compounds of Silicon. Part V. Octaisopropylsilsesquioxane, its bromination and ^1H nuclear magnetic resonance spectroscopy. J. H. Bishop, J. M. E. Goldschmidt, R. A. Shaw and A. R. Katritzky. *J. Chem. Soc.*, **1965**, 7325-7328.
80. Phosphorus-Nitrogen Compounds. Part XVIII. Further studies on the alkyl halide catalysed rearrangements of alkoxy-cyclophosphazenes. B. W. Fitzsimmons, C. Hewlett and R. A. Shaw. *J. Chem. Soc.*, **1965**, 7432-7436.
81. Phosphorus-Nitrogen Compounds. Part XIX. The ^1H nuclear magnetic resonance spectra of some geminal ethoxy-cyclotriphosphazatrienes. Virtual coupling with two and three phosphorus atoms. C. Hewlett and R. A. Shaw. *J. Chem. Soc.*, **1966**, 56-59.
82. Complexes of hexamethylbenzene with chloro- and dimethylamino-cyclophosphazenes. Some alternation of properties with change in ring size. S. K. Das, R. A. Shaw, B. C. Smith and C. P. Thakur. *Chem. Commun.*, **1966**, 33.
83. Inorganic Polymers. R. A. Shaw. *May & Baker Laboratory Bulletin*, **1966**, 7, No. 1, p. 10-15.
84. Acceptor properties of triphenyl derivatives of Group V. R. A. Shaw, B. C. Smith and C. P. Thakur. *Chem. Commun.*, **1966**, 228.
85. Chemical reactions under the influence of an electrical discharge. Part I. The action of the discharge on hexamethyldisiloxane and tetramethylsilane. R. C. Golesworthy and R. A. Shaw. *Proc. Roy. Soc., (A)*, **1966**, 292, 489-505.
86. Phosphorus-Nitrogen Compounds. Part XX. The reaction of piperidine with hexachlorocyclotriphosphazatriene; the replacement pattern and the structure of the products; the "cis-effect". R. Keat and R. A. Shaw. *J. Chem. Soc., (A)*, **1966**, 908-913.
87. Phosphorus-Nitrogen Compounds. Part XXI. Alkylthio- and phenylthio-cyclotriphosphazatrienes. A. P. Carroll and R. A. Shaw. *J. Chem. Soc., (A)*, **1966**, 914-921.
88. Structure and Mechanism in Organophosphorus Chemistry (Essay Review). R. A. Shaw. *Chem. and Ind.*, **1966**, 1293-1294.

89. Lithium bistrimethylsilylamide and tristrimethylsilylamine. E. H. Amonoo-Neizer, R. A. Shaw, D.O. Skovlin and B. C. Smith. *Inorg. Synth.*, **1966**, 8, 19-22. H.F. Holtzclaw Jr., Ed., McGraw Hill Book Co. New York.
90. Diphenyl phosphorochlorodite (diphenyl monochlorophosphite). W. Hewertson, R. A. Shaw and B. C. Smith. *Inorg. Synth.*, **1966**, 8, 68-70. H.F. Holtzclaw Jr., Ed., McGraw Hill Book Co., New York.
91. Alkoxy- and aryloxy-cyclophosphazenes (alkyl and aryl phosphonitrilates). B. W. Fitzsimmons and R. A. Shaw. *Inorg. Synth.*, **1966**, 8, 77-84. H.F. Holtzclaw Jr., Ed., McGraw Hill Book Co., New York.
92. Phosphorus-Nitrogen Compounds. Part XXI. Alkylthio- and phenylthio-cyclotriphosphazatrienes. A. P. Carroll and R. A. Shaw. *J. Chem. Soc., (A)*, **1966**, 914-921.
93. Phosphorus-Nitrogen Compounds. Part XXII. The reactions of hexachlorocyclotriphosphazatriene with isopropylamine. S.K. Das, R. Keat, R. A. Shaw and B. C. Smith. *J. Chem. Soc., (A)*, **1966**, 1677-1680.
94. Phosphorus-Nitrogen Compounds. Part XXIII. Dimethylaminophenoxycyclotriphosphazatrienes. D. Dell, B. W. Fitzsimmons, R. Keat and R. A. Shaw. *J. Chem. Soc. (A)*, **1966**, 1680-1686.
95. Structure and Basicity. Part IV. Aminochlorocyclotriphosphazatrienes. D. Feakins, W. A. Last, S. N. Nabi and R. A. Shaw. *J. Chem. Soc., (A)*, **1966**, 1831-1834.
96. 1,3,5-Triazines. Part VII. The ultraviolet, infrared and ¹H nuclear magnetic resonance spectra of some chloro-1,3,5-triazine derivatives. R. A. Shaw and P. Ward. *J. Chem. Soc. (B)*, **1967**, 123-126.
97. Some thermal condensation reactions of phenylphosphonothioic diamides. A new phosphorus-nitrogen-sulphur heterocyclic system. E. H. M. Ibrahim and R. A. Shaw. *Chem. Commun.*, **1967**, 244.
98. Dimeric phosphinoborines. W. Gee, R.A. Shaw and B.C. Smith. *Inorg. Synth.*, **1967**, 9, 19-24. S.Y. Tyree, Jr., Ed., McGraw-Hill Book Co., New York.
99. The Radiation Chemistry of Silicon compounds. R. A. Shaw. *Pure and Applied Chemistry*, **1966**, 13, 297-312. (Also published as a special bound volume, Organosilicon Chemistry, Butterworth & Co. Ltd., London, 1967. p. 297-312.)
100. Phosphorus-Nitrogen Compounds. Part XXIV. Studies on the alcoholysis and hydrolysis of geminal phenylchlorocyclotriphosphazatrienes. Some "cyclotriphosphazadienes" and a "cyclotriphosphazene". B.W. Fitzsimmons, C. Hewlett, K. Hills and R.A. Shaw. *J. Chem. Soc., (A)*, **1967**, 679-683.

Miscellaneous derivatives of hexachlorocyclo-triphosphazatriene with mixed substituents including dimethylamino-, methoxy-, phenoxy-, phenyl-, thioethoxy-, and thiophenoxy- groups: Calculation of substituent constants. D. Feakins, W. A. Last, S. N. Nabi, R. A. Shaw and P. Watson. *J. Chem. Soc. (A)*, **1969**, 196-202.
118. 1,3,5-Triazines. Part VIII. Reactions of cyanuric chloride with *NN*-dialkylnaphthylamines and *O*-alkylnaphthyl ethers. R. A. Shaw and P. Ward. *J. Chem. Soc. (B)*, **1968**, 1431-1435.
119. 1,3,5-Triazines. Part IX. Reactions of hexamethylmelamine with iodine. S. K. Das, T. Gündüz, R. A. Shaw and B. C. Smith. *J. Chem. Soc. (A)*, **1969**, 524-526.
120. An unusually complex phosphazene arising from the reaction of hexachlorocyclo-triphosphazatriene with diphenylmagnesium in 1,4-dioxane. M. Biddlestone, R. A. Shaw and D. Taylor. *J. Chem. Soc., Chem. Commun.*, **1969**, 320.
121. 1,3,5-Triazines. Part X. Complexes of 2,4,6-trisdimethylamino-1,3,5- triazine. S. K. Das, T. Gündüz, R. A. Shaw and B. C. Smith. *J. Chem. Soc. (A)*, **1969**, 1403-1404.
122. 1,3,5-Triazines. Part XI. Reaction mechanisms and solvent effects in the reactions of cyanuric chloride with *NN*-diethyl aniline and *NN*- diethyl-1-naphthylamine. R. A. Shaw and P. Ward. *J. Chem. Soc. (B)*, **1969**, 596-599.
123. *Cis*- and *trans*-1,3 -Diethyl-2,4-diphenyl-2,4-dithiocyclodiphosphazanes. C. D. Flint, E. H. M. Ibrahim, R. A. Shaw, B. C. Smith and C. P. Thakur. *Tetrahedron Letters*, **1969**, 36. 3061-3062.
124. Phosphorus-Nitrogen Compounds. Part XXVIII. Some reactions of 2,2,4 ,4-tetrachloro-6,6-diphenylcyclo-triphosphazatrienes with amines. V.B. Desai, R.A. Shaw and B.C. Smith. *J. Chem. Soc. (A)*, **1969**, 1977-1980.

125. The structures of chlorodimethylaminocyclotetraphosphazetetraines. V.B. Desai, R.A. Shaw, B.C. Smith and D. Taylor. *Chem. and Ind.*, **1969**, 1177.
126. Structure and Basicity. Part VII. Cyclotriphosphazatrienes containing Amino-, Chloro- and Phenyl- groups. New Data: Substituent Constants for Amino-groups and their Application to the 'Saturation Effect' and to Structure Determination; pK'_a , 2 and Structure. D. Feakins, R. A. Shaw, P. Watson and S. N. Nabi. *J. Chem. Soc. (A)*. **1969**, 2468-2475.
127. Proton Spectra of Symmetrical Cyclotriphosphazatrienes. E. G. Finer, R. K. Harris, M. R. Bond, R. Keat and R. A. Shaw. *J. Molecular Spect.*, **1970**, 33, 72-83.
128. A theory for the intermolecular nucleus-electron scalar interaction and its application to dynamic polarisation results of ^{31}P nuclei. R. A. Dwek, R. E. Richards, D. Taylor and R. A. Shaw. *J. Chem. Soc., (A)*, **1970**, 1173-1180.
129. Phosphorus-Nitrogen Compounds. Part XXIX. Compound Formation between Chloroisopropylaminocyclotriphosphazatrienes. S. K. Das, D. Feakins, W. A. Last, S. N. Nabi, S. K. Ray, R. A. Shaw and B. C. Smith. *J. Chem. Soc. (A)*, **1970**, 616-617.
130. Phosphorus-Nitrogen Compounds. Part XXX. The Reaction of Phenylmagnesium Bromide and Diphenylmagnesium with Octachlorocyclotetraphosphazetetraine. M. Biddlestone and R. A. Shaw. *J. Chem. Soc. (A)*, **1970**, 1750-1757.
131. Phosphazenes. R. Keat and R. A. Shaw. *Organophosphorus Chemistry. Vo. 1.* Chapter 9, pp. 214-245. Specialist Periodical Report, Chemical Society, London, **1970**.
132. Inorganic Polymers. Part IV. Reaction of Poly(P-phenylphosphonic Imide). The Replacement Polymerization of Poly(P-phenylphosphonic Imide) with Piperazine. R. A. Shaw and Takeshi Ogawa. *J. Appl. Polymer Sci.*, **1970**, 14, 1547-1552.
133. Phosphorus-Nitrogen Compounds. Part XXXI. Reactions of Hexachlorocyclotriphosphazatriene with Aniline. V. B. Desai, R. A. Shaw and B. C. Smith. *J. Chem. Soc. (A)* **1970**, 2023-2025.
134. The Reactions of Chloramine-T with Phosphorus and Sulfur Compounds. D. K. Padma, R. A. Shaw, G. P. Thakur, A. R. Vasudeva Murthy and M. Woods. *Quart. Reports Sulfur Chem.*, **1970**, 5, 232.
135. Rotational Isomerism in Some Tri-ortho-tolylphosphine Derivatives. R. A. Shaw, M. Woods, T. S. Cameron and B. Dahlen. *Chem. and Ind.*, **1971**, 151-152.
136. Phosphorus Looks Ahead. R. A. Shaw. *Nature*, **1970**, 228, 214.
137. New Flameproofing Agents and Fertilisers. R. A. Shaw. *Chem. and Ind.*, **1970**, 1407.
138. Phosphorus Chemistry. R. A. Shaw. *Chem. in Britain*, **1971**, 7, 215.

139. Preparation and Some Properties of Lead Thiolates. R. A. Shaw and M. Woods. *J. Chem. Soc. (A)*, **1971**, 1569-1571.
140. Phosphorus-Sulphur Compounds. Part 1. The Reaction of Lead Thiolates with Phosphoryl Chloride and with Thiophosphoryl Chloride. R. A. Shaw and M. Woods. *Phosphorus*, **1971**, *1*, 41-47.
141. Octaisopropyloctasilsesquioxane, Brominated Octaisopropyloctasilsesquioxanes and their Reactions. J. H. Bishop and R. A. Shaw. *Austral. J. Chem.*, **1971**, *24*, 1211-1218.
142. Phosphorus-Nitrogen Compounds. Part XXXII. The Reaction of Hexachlorocyclotriphosphazatriene with Diphenylmagnesium in 1,4-Dioxan. M. Biddlestone and R. A. Shaw. *J. Chem. Soc. (A)*, **1971**, 2715-2720.
143. The Crystal Structures of *cis*- and *trans*-[PhP(S)NEt]₂ and *trans*- [PhP(S)NMe]₂. General Criteria for Assigning *cis*- and *trans*-structures to Cyclodiphosphazanes. E. H. M. Ibrahim, R. A. Shaw, B. C. Smith, C. P. Thakur, M. Woods, G. J. Bullen, J. S. Rutherford, P. A. Tucker, T. S. Cameron, K. D. Howlett and C. K. Prout. *Phosphorus*, **1971**, *1*, 153-155.
144. A Novel Bicyclic Compound from the Thermolysis of *NN'*-Dicyclohexyl Phenylphosphonothioic Diamide. J. D. Healy, E. H. M. Ibrahim, R. A. Shaw, T. S. Cameron, K. D. Howlett and C. K. Prout. *Phosphorus*, **1971**, *1*, 157-158.
145. Phosphorus-Nitrogen Compounds. Part XXXIII. *Cis*- and *trans*-1,3- Diethyl-2,4-diphenyl-2,4-dithiocyclodiphosphazanes. C. D. Flint, E. H. M. Ibrahim, R. A. Shaw, B. C. Smith and C. P. Thakur. *J. Chem. Soc. (A)*, **1971**, 3513-3516.
146. Phosphorus-Sulphur Compounds. Part II. The Synthesis and Some Properties of Trialkyl and Triaryl Trithiophosphites. A Comparison of ³J(*P-H*) Values in Trialkylthio-Derivatives of P(III) and P(V), and of their Trialkyloxy-Analogues. R. A. Shaw and M. Woods. *Phosphorus*, **1971**, *1*, 191-197.
147. Chloramine-T. Part 1. The Oxidation of Some Acyclic Organic Sulfur Compounds. D. K. Padma, R. A. Shaw, A. R. Vasudeva Murthy and M. Woods. *Intern. J. Sulfur Chem.*, **1971**, *A1*, 243-249.
148. Struktur und Bildungsweise eines neuen phosphorhaltigen Heterocyclus; Länge der P-Cl Bindung und ³⁵Cl-NQR Frequenz. T. S. Cameron, C. Y. Cheng, T. Demir, K. D. Howlett, R. Keat, A. L. Porte, C. K. Prout and R. A. Shaw. *Angew. Chemie*, **1972**, *84*, 530-531. Structure and Mechanisms of Formation of a Novel Phosphorus-containing Heterocycle; P-Cl Bond Length and ³⁵Cl-NQR Frequency. *Angew. Chem. Internal. Edit.*, **1972**, *11*, 510-511.
149. Phosphorus-Sulphur Compounds. Part III. Long Range Phosphorus-Hydrogen Coupling in Aromatic Esters and Thioesters of Phosphorus (V). R. A. Shaw and M. Woods. *Phosphorus*, **1972**, *2*, 61-65.
150. Chloramine-T. Part II. The Oxidation of Some Phosphorus-Sulphur Compounds. D. K. Padma, R. A. Shaw, C. P. Thakur, A. R. Vasudeva Murthy and M. Woods. *Phosphorus*, **1972**, *2*, 81-85.

151. A Correlation Between P-Cl Bond Lengths and ^{35}Cl Nuclear quadrupole Resonance Frequencies in Some Cyclophosphazenes; the Use of ^{35}Cl Nuclear Quadrupole Resonance Spectroscopy for Structural Assignments in Cyclodiphosphazanes. R. Keat, A. L. Porte, D. A. Tong and R. A. Shaw. *J. Chem. Soc., Dalton Trans.*, **1972**, 1648-1651.
152. Chemical Bonds - A Collaborative Programme. An interview with Professor R. Shaw. *Chem. in Brit.*, **1972**, 8, 526-527.
153. Reaction of Sulfur Heterocycles with Chloramine-T. H. C. Mruthyunjaya, D. K. Padma, R.A. Shaw, A. R. Vasudeva Murthy and M. Woods. *Int. J. Sulfur Chem.*, **1973**, 2A, 236.
154. Phosphorus-Nitrogen Compounds. Part XXXIV. The Reactions of Hexachlorocyclotriphosphazatriene with Ethylamine: Comparisons with Isopropylamine and t-Butylamine. Rabindranath N. Das, R. A. Shaw, B. C. Smith and M. Woods. *J. Chem. Soc., Dalton Trans.*, **1973**, 709-713.
155. Rotational Isomerism in Tri-*ortho*-tolylphosphine Sulphide and Selenide: a Correction. R. A. Shaw, M. Woods, W. Egan and J. J. Jacobus. *Chem. and Ind.*, **1973**, 532.
156. Virtual Coupling of Dimethylamino-Protons in the N.M.R. Spectra of Dimethylaminocyclotetraphosphazetraenes as a Criterion for Structure Determination. Crystallographic Evidence for the Configurational Structure of 2,2,4,6,6-*trans*-8;4,8- $\text{N}_4\text{P}_4\text{Cl}_6(\text{NMe}_2)_2$ and 2-*trans*-6;2,4,4,6,8,8- $\text{N}_4\text{P}_4\text{Cl}_2(\text{NMe}_2)_6$. G. J. Bullen, P. E. Dann, V. B. Desai, R. A. Shaw, B. C. Smith and M. Woods. *Phosphorus*, **1973**, 3, 67-69.
157. The X-ray Crystal and Molecular Structures of Some Tritolylphosphine Derivatives. Part II. Tri-*ortho*-, Tri-*meta*-, and Tri-*para*-tolylphosphine Sulphides. T. S. Cameron, K. D. Howlett, R. A. Shaw and M. Woods. *Phosphorus*, **1973**, 3, 71-73.
158. The Faraday Effect of Some Aminochlorocyclotriphosphazatrienes. M. F. Bruniquel, J.-P. Faucher, J-F. Labarre, M. Hasan, S. S. Krishnamurthy, R. A. Shaw and M. Woods. *Phosphorus*, **1973**, 3, 83-85.
159. Phosphorus-Nitrogen Compounds. Part XXXV. Friedel-Crafts Reactions of Chlorodimethylaminocyclotriphosphazatrienes with Benzene. S. K. Das, R. A. Shaw and B. C. Smith. *J. Chem. Soc., Dalton Trans.*, **1973**, 1883-1888.
160. Inorganic Polymers. Part V. The Reaction of Hexachlorocyclotriphosphazatriene with Phenyl-lithium. M. Biddlestone and R. A. Shaw. *Phosphorus*, **1973**, 3, 95-98.
161. Cyclophosphazenes and Related Ring Compounds. R. Keat and R. A. Shaw. *Organic Phosphorus Compounds, Vol. 6*, Chapter 17, 833-940. Eds. G.M. Kosolapoff and L. Maier. Interscience, **1973**.
162. Phosphorus-Nitrogen Compounds. Part XXXVI. Alkylthio- and Arylthio-cyclotetraphosphazetraenes. A. P. Carroll, R. A. Shaw and M. Woods. *J. Chem. Soc., Dalton Trans.*, **1973**, 2736-2740.

- 163.** Phosphorus-Nitrogen Compounds. Part XXXVII. The Syntheses, Properties and Some Reactions of (2', 2', 2'-Triphenylphosphazen-1-yl)-cyclotripphosphazatrienes and -cyclotetraphosphazetraenes. M. Biddlestone and R. A. Shaw. *J. Chem. Soc., Dalton Trans.*, **1973**, 2740-2747.
- 164.** The Reaction of Benzophenone with Hexa(2,2,2-trifluoroethoxycyclotri- phosphazatriene at Elevated Temperature. R. A. Shaw and E. T. Mukmenev. *Doklady Akad. Nauk SSSR*, **1973**, 208, 379-380.
- 165.** New Method of Synthesis of 1,1,3-triphenyl-1-*H*-isoindole. R.A. Shaw and E.T. Mukmenev. *Khimiya Geterosiklicheskikh Soedinenii*, 1973, No. 7, 945-946.
- 166.** NMR and Crystallographic Evidence for the Structures of the Isomeric Geminal Cyclophosphazettraenes, $N_4P_4Ph_4Cl_4$ and $N_4P_4Ph_4(NMe_2)_4$. M. Biddlestone, G. J. Bullen, P. E. Dann, S. S. Krishnamurthy, R. A. Shaw and M. Woods. *Phosphorus*, **1973**, 3, 179-181.
- 167.** 1,3,5-Triazines. Part XII. The Reaction of Trichloro-1,3,5-triazine (cyanuric chloride) with *N*-Phenyl-pyrrole, -indole, -carbazole, and -diphenylamine, and *N*-Ethyl-pyrrole, -carbazole, and -diphenylamine. R. A. Shaw and P. Ward. *J. Chem. Soc., Perkin II Trans.*, **1973**, 2075-2078.
- 168.** Structure of 2,2,4,4-Tetrachloro-6-phenyl-6-(2',2',2'-triphenylphos- phazen-1'-yl)-cyclotripphosphazatriene - an Example of a Cyclophosphazene with a Phosphazanyl Side-Chain. M. Biddlestone, G. J. Bullen, P. E. Dann and R. A. Shaw. *J. Chem. Soc., Chem. Commun.*, **1974**, 2, 56-57.
- 169.** Phosphorus Nitrogen Compounds. Part XXXVIII. Reactions of Phenylphosphonic Dichloride and Phenylphosphonothioic Dichloride with Dibenzylamine. J. D. Healy, R. A. Shaw, B. C. Smith, C. P. Thakur and M. Woods. *J. Chem. Soc., Dalton Trans.*, **1974**, 1286-1290.
- 170.** Phosphorus-Nitrogen Compounds. Part XXXIX. Friedel-Crafts Reactions of Chloro(piperidino)cyclotripphosphazatrienes with Benzene. S.K. Das, R.A. Shaw and B.C. Smith. *J. Chem. Soc., Dalton Trans.*, **1974**, 1610-1613.

The First Example of a Geminal to *trans*-Nongeminal Amino-group Migration in Phosphazene Chemistry. J. K. Fincham, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen) and R. A. Shaw. *J. Chem. Soc., Chem. Commun.*, **1985**, 252-254.
259. Structural Investigations of Phosphorus-Nitrogen Compounds. 1. The Structures of Three Monospiro Compounds: $N_3P_3[O(CH_2)_2O]Cl_4$, $N_3P_3[O(CH_2)_3O]Cl_4$ and $N_3P_3[O(CH_2)_4O]Cl_4$. The Relationship of OPO Bond Angles in PO_2N_2 Tetrahedra with ^{31}P Chemical Shifts. S. R. Contractor, M. B. Hursthouse, L. S. Shaw (née Gözen), R. A. Shaw and H. Yilmaz. *Acta Cryst.*, **1985**, B41, 122-131.
260. Aromatic Amines and their Derivatives. Part. 2. The Synthesis, Spectroscopic Properties, Molecular and Crystal Structure of *N*-Acetyl-4, *N*-dimethyl-6-(*N*-acetyl-*p*-toluidinomethyl)aniline. P. Chakrabarti, K. Venkatesan, T. S. Cameron, T. Demir and R. A. Shaw. *J. Crystallogr. and Spectroscopic Res.*, **1985**, 15, 229-245.

261. X-ray crystallographic, ^1H and ^{13}C N.M.R. investigations of the potentially heptadentate ligand trensal, 2,2',2''-tris- (salicylideneimino)triethylamine. N. Gündüz, T. Gündüz, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen), R. A. Shaw and M. Tüzün. *J. Chem. Soc., Perkin II Trans.*, **1985**, 899-902.
262. Phosphorus-Nitrogen Compounds. Part 47. Conformations and Phosphorus-Phosphorus spin-spin coupling constants in phosphazenylicyclophosphazenes M. Biddlestone, R. Keat, H. G. Parkes, H. Rose, D. S. Rycroft and R. A. Shaw. *Phosphorus Sulfur*, **1985**, 25, 25-31.
263. Studies of Phosphazenes. Part 18. Aminolysis Reactions of (2',2',2'-triphenylphosphazene-1'-yl)pentachlorocyclotriphosphazene, $\text{N}_3\text{P}_3\text{Cl}_5(\text{NPh}_3)$. S. S. Krishnamurthy, P. Ramabrahmam, R. A. Shaw, A. R. Vasudeva Murthy and M. Woods. *Z. anorg. allg. Chem.*, **1985**, 522, 226-234.
264. Phosphorus-Nitrogen Compounds. Part 48. The reactions of *N,N*-dimethyltoluidines with phosphorus(v) chlorides. Formation of a novel heterocyclic system. C. Y. Cheng and R. A. Shaw. *Phosphorus Sulfur*, **1986**, 26, 185-192.
265. The phosphazenes-structural parameters and their relationships to physical and chemical properties. R. A. Shaw. *Phosphorus Sulfur*, **1986**, 28, 99-128.
266. Synthetic, N.M.R. spectroscopic and X-ray crystallographic studies on phosphazenylicyclophosphazenes. J. K. Fincham, M. B. Hursthouse, R. Keat, H. G. Parkes, D. S. Rycroft, L. S. Shaw (née Gözen) and R. A. Shaw. *Phosphorus Sulfur*, **1986**, 28, 175-183.
267. An investigation of the reaction products of $\text{N}_3\text{P}_3\text{Cl}_4(\text{NH}_2)_2$ with nucleophilic reagents. Examples of geminal \rightarrow non-geminal rearrangements. J. K. Fincham, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen) and R. A. Shaw. *Phosphorus Sulfur*, **1986**, 28, 185-194.
268. Potentiometric and conductometric studies of the behaviour of phosphorus nitrogen compounds towards perchloric acid in non-aqueous media. W. F. Deutsch, N. Gündüz, T. Gündüz, E. Kılıç, L. S. Shaw (née Gözen), R. A. Shaw and M. Tüzün. *Phosphorus Sulfur*, **1986**, 28, 195-202.
269. The Reactions of $\text{N}_3\text{P}_3\text{Cl}_6$ with polyfunctional reagents. H. A. Al-Madfa, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen) and R. A. Shaw. *Phosphorus Sulfur*, **1986**, 28, 203-211.
270. X-ray crystallographic and ^{35}Cl N.Q.R. spectroscopic studies on chlorocyclophosphazenes. M. B. Hursthouse, A. L. Porte, L. S. Shaw (née Gözen) and R. A. Shaw. *Phosphorus Sulfur*, **1986**, 28, 213-220.
271. The Structures and Mode of Formation of some Cyclodiphosph(v)azanes and their *cis-trans* Isomerisation. M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen), R. A. Shaw and D. A. Watkins. *Phosphorus Sulfur*, **1986**, 28, 221-227.
272. The reactions of $\text{N}_3\text{P}_3\text{Cl}_6$ and related compounds with difunctional reagents. Comparisons and contrasts. A. H. Alkubaisi, W. F. Deutsch, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen) and R. A. Shaw, *Phosphorus Sulfur*, **1986**, 28, 229-237.

- 273.** The reactions of geminal $N_3P_3Ph_2Cl_4$ and $N_3P_3(NHBU^l)_2Cl_4$ with difunctional reagents. X-ray crystallography, N.M.R. spectroscopy and basicity of the products. W. F. Deutsch, N. Gündüz, T. Gündüz, M. B. Hursthouse, E. Kılıc, H. G. Parkes, L. S. Shaw (née Gözen), R. A. Shaw and M. Tüzün. *Phosphorus Sulfur*, **1986**, 28, 253-260.
- 274.** Synthetic, N.M.R. spectroscopic and X-ray crystallographic investigations of the products of the reactions of phenyl (methyl) phosphonothioic dichloride and thiophosphoryl chloride with primary amines. M. B. Hursthouse, E. H. Ibrahim, H. G. Parkes, L. S. Shaw (née Gözen), R. A. Shaw and D. A. Watkins. *Phosphorus Sulfur*, **1986**, 28, 261-266.
- 275.** Isolation, N.M.R. spectra and X-ray crystal structures of two isomeric $N_3P_3Cl_2[O(CH_2)_3O]_2$ derivatives. The first example of dispiro/spiro-ansa isomerism in phosphazene chemistry. Comparisons of *trans*-annular bridged cyclophosphazenes. S. R. Contractor, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen), R. A. Shaw and H. Yılmaz. *Phosphorus Sulfur*, **1986**, 28, 267-275.
- 276.** X-ray crystallographic investigations of some spiro-derivatives of Cyclotriphosphazatrienes. A. H. Alkubaisi, H. A. Al-Madfa, W. F. Deutsch, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen) and R. A. Shaw. *Phosphorus Sulfur*, **1986**, 28, 277-288.
- 277.** Structural Investigations of Phosphorus-Nitrogen Compounds. 2. The structures of $N_3P_3(NH_2)_2C1_4$, $N_3P_3(NPPh_3)(NH_2)C1_4$ and $N_3P_3(NPPh_3)Cl_5$ and comparison with other phosphazenyolphosphazenes. The relationship of conformation in the solid state to conformation in solution. J. K. Fincham, M. B. Hursthouse, H. G. Parkes, L. S. Shaw (née Gözen) and R. A. Shaw. *Acta Cryst.*, **1986**, B42, 462-472.
- 278.** Recent advances in the chemistry, N.M.R. spectroscopy and structure-property relationships of phosphorus compounds. R. A. Shaw. *Sociedad Chilena de Química, division de química inorganica*. A monograph, **1986**, pp. 1-76. PNUD - UNESCO CHI 84/006.
- 279.** Structure and Basicity. Part 10. Conductometric and potentiometric titrations of some cyclotriphosphazatrienes in non-aqueous media. The conductivities of alkali-metal acetates on titration with perchloric acid in acetic acid. N. Gündüz, T. Gündüz, E. Kılıc, S. G. Öztas, M. Tüzün, L. S. Shaw (née Gözen) and R. A. Shaw. *J. Chem. Soc., Dalton Trans.*, **1987**, 925-930.
- 280.** Studies of Phosphazenes. Part 29. Reaction of octachlorocyclotetraphosphazene with sodium 2,2,2-trifluoroethoxide. K. C. Kumara Swamy, S. S. Krishnamurthy, A. R. Vasudeva Murthy, R. A. Shaw and M. Woods. *Ind. J. Chem. (A)*, **1986**, 25, 1004-1011.
- 281.** Phosphorus-Nitrogen Compounds. Part 49. The synthesis and mechanism of formation of 6-chloro-5,6,7,12-tetrahydro-2,5,7,10-tetramethyldibenzo- [d,g][1,3,2]-diazaphosphocine 6-oxide and 6-sulphide. T. Demir and R. A. Shaw. *J. Chem. Soc., Perkin Trans. I*, **1987**, 1547-1552.
- 282.** Phosphorus-Nitrogen Compounds. Part 50. Further Studies on the Formation of Bicyclic Cyclotetraphosphazetetraene Derivatives. S. R. Contractor, Z. Kılıc and R. A. Shaw. *J. Chem. Soc., Dalton Trans.*, **1987**, 2023-2029.

- 283.** The Stereochemistry of the Nitrogen Atom, The Length of the Phosphorus- Nitrogen Bond and their Relationship to $^3J(\text{PNCC})$ Spin-Spin Coupling Constants. The Crystal Structures of $\text{N}_3\text{P}_3[\text{NMe}(\text{CH}_2)_3\text{NMe}]\text{Cl}_4$, $\text{N}_4\text{P}_4(\text{NHET})_6(\text{NEt})$, and $\text{N}_4\text{P}_4(\text{NMe}_2)_5(\text{NHET})(\text{NEt})$. W. F. Deutsch, M. B. Hursthouse, Z. Kılıc, H. G. Parkes, L. S. Shaw (née) Gözen and R. A. Shaw. *Phosphorus Sulfur*, **1987**, 32, 81-85.
- 284.** Phosphorus-Nitrogen Compounds. Part 53. Ultraviolet, infrared, and ^1H nuclear magnetic resonance spectra of some anilino derivatives of phosphorus; the phosphorus moiety attached to nitrogen or to aromatic carbon. C. Y. Cheng and R. A. Shaw. *J. Cryst. and Spectrosc. Res.*, **1987**, 17, 331-334.
- 285.** Phosphorus-Nitrogen Compounds. Part 52. The Synthesis of some 1,3,2-Benzodiazaphosphorine 2-Oxides and 2-Sulphides. T. Demir, F. J. Raveney and R. A. Shaw. *Phosphorus Sulfur*, **1987**, 33, 155-163.
- 286.** Phosphorus-Nitrogen Compounds. Part 51. Carbon-13 and Phosphorus-31 Nuclear Magnetic Resonance Properties of Phenylphosphonothioic Di(monoalkylamides). Determination of Aromatic Substituent Constants by ^{13}C Nuclear Magnetic Resonance Spectroscopy. H. G. Parkes, R. A. Shaw and D. A. Watkins. *J. Chem. Soc., Dalton Trans.*, **1987**, 2479-2484.
- 287.** Georg Wittig 1897-1987 (an obituary). R. A. Shaw. *Chem. in Britain*, **1988**, 24, 63.
- 288.** Structural Investigations of Phosphorus-Nitrogen Compounds. 3. The Structures of $\text{N}_3\text{P}_3[\text{O}(\text{CH}_2)_3\text{O}](\text{NC}_4\text{H}_8)_4$ and *trans*- $\text{N}_3\text{P}_3[\text{O}(\text{CH}_2)_3\text{O}](\text{NC}_4\text{H}_8)_2\text{Cl}_2$ and a comparison with $\text{N}_3\text{P}_3[\text{O}(\text{CH}_2)_3\text{O}]\text{Cl}_4$. The Effect of Replacing the Electron-withdrawing Chlorine Atoms by Electron-releasing Pyrrolidino Groups. P-O Bond Lengths and Their Relationship to Spin-Spin Coupling Constants $^3(\text{POCC})$. A. H. Alkubaisi, M. B. Hursthouse, L. S. Shaw (née Gözen) and R. A. Shaw. *Acta Crvstallogr.*, **1988**, B44, 16-22.

Kupka, R. A. Shaw, D. B. Davies, M. B. Hursthouse and G. D. Sykara. *J. Amer. Chem. Soc.*, **1997**, *119*, 1143-1144.
- 316.** New Molecular Receptors with Cyclophosphazene Subunits: Synthesis, Reactivity and Structure-Property Relationships. K. Brandt, I. Porwolik-Czomperlik, M. Siwy, T. Kupka, R. A. Shaw, D. B. Davies and R. A. Bartsch. *J. Inclusion Phenomena & Macrocyclic Chem.*, **1999**, *35*, 281-289.
- 317.** A Regioselective Route to Polytopic Receptors by Diaminolysis of Chlorocyclotriphosphazatriene-Containing Crown Ethers. K. Brandt, I. Porwolik-Czomperlik, M. Siwy, T. Kupka, R. A. Shaw, S. Ture, A. Clayton, D. B. Davies, M. B. Hursthouse and G. D. Sykara. *J. Org. Chem.*, **1999**, *64*, 7299-7304.
- 318.** Thermodynamic vs Supramolecular Effects in the Regiocontrol of the Formation of New Cyclotriphosphazene-Containing Chiral Ligands with 1,1'-Binaphthyl Units: Spiro vs Ansa Substitution at the N₃P₃ Ring. K. Brandt, I. Porwolik-Czomperlik, M. Siwy, T. Kupka, R. A. Shaw, D. B. Davies, M. B. Hursthouse and G. D. Sykara. *J. Amer. Chem. Soc.*, **1997**, *119*, 12432-12440.
- 319.** Chiral Configurations of Cyclophosphazenes. D. B. Davies, T. A. Clayton, R. E. Eaton, R. A. Shaw, A. Egan, M. B. Hursthouse, G. D. Sykara, I. Porwolik-Czomperlik, M. Siwy and K. Brandt. *J. Amer. Chem. Soc.*, **2000**, *122*, 12447-12457.
- 320.** Chiral Configurations of Spermine-Bridged Cyclotriphosphazatrienes. Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç, Thomas A. Mayer, Robert A. Shaw and Gonul Yenilmez. *J. Chem. Soc., Dalton Trans.*, **2001**, 365-370.
- 321.** Conformational polymorphism in a chiral spiro-*cis*-ansa-bridged cyclotriphosphazatriene derivative, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Hanife Ibisoglu, Adem Kılıç and Robert A. Shaw. *Acta Cryst.*, **2001**, Conformational C57, o51-o54.
- 322.** Structural investigations of phosphorus-nitrogen compounds. 4. Steric and electronic effects in dibenzylamino derivatives of hexachlorocyclotriphosphazatriene and 4,4,6,6-tetrachloro-2,2-diphenylcyclotriphosphazatriene, Serap Besli, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Adem Kılıç, Thomas A. Mayer, Robert A. Shaw and Aylin Uslu. *Acta Cryst.*, **2002**, *B58*, 545-552.
- 323.** Diastereoisomeric Singly-Bridged Cyclophosphazene-Macrocyclic Compounds. Iwona Porwolik-Czomperlik, Krystyna Brandt, T. Andrew Clayton, David B. Davies, Robert J. Eaton and Robert A. Shaw. *Inorg. Chem.*, **2002**, *41*, 4944-4951.
- 324.** Structural Investigations of Phosphorus-Nitrogen Compounds. 5. Relationships of Molecular Parameters of 2,2-Diphenyl-4,6-*cis*-oxytetra(ethyleneoxy)-4,6-R₂-cyclotriphosphazatrienes (R = Cl, OCH₂CF₃, OPh, OMe, NHPH, NHBu^t) with Substituent Basicity Constants. Serap Beşli, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Adem Kılıç, Thomas A. Mayer and Robert A. Shaw. *Acta Cryst.*, **2002**, *B58*, 1067-1073.

325. Anomalous NMR behaviour of Meso Compounds with Remote Stereogenic Centers on addition of Chiral Shift Reagents and Chiral Solvating Agents. Serap Beşli, Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç, Robert A. Shaw, Gönül Yenilmez Çiftçi and Serkan Yeşilot. *J. Amer. Chem. Soc.*, **2003**, *125*, 4943-4950.
326. Stereogenic properties of 1,3-disubstituted derivatives of cyclotriphosphazene: *cis* (meso) and *trans* (racemic) isomers. Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç, Robert A. Shaw, Şule Şahin, Aylin Uslu and Serkan Yeşilot. *Inorg. Chem. Comm.*, **2004**, *7*, 657-661.
327. Chiral Configurations of Spirane-bridged Cyclotriphosphazenes. Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç, Robert A. Shaw and Aylin Uslu. *Eur. J. Org. Chem.*, **2004**, 1881-1886.
328. Chirality in Cyclotriphosphazatrienes which have One Stereogenic Centre. Serap Beşli, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Adem Kılıç, Thomas A. Mayer, Robert A. Shaw and Aylin Uslu. *Inorg. Chem. Comm.*, **2004**, *7*, 842-846.
329. Retention of Configuration in the Nucleophilic Substitution Reactions of some Nine-membered Ansa Derivatives of Cyclotriphosphazatriene. Serap Beşli, Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Hanife İbişoğlu, Adem Kılıç and Robert A. Shaw. *Chemistry - A European Journal*, **2004**, *10*, 4915-4920.
330. Crystallographic Proof of Double Walden Inversion in Nucleophilic Substitution Reactions of Macrocyclic-Cyclotriphosphazene Derivatives. Serap Beşli, Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç and Robert A. Shaw, *Eur. J. Inorg. Chem.*, **2005**, 959-966.
331. Structural Investigations of Phosphorus-Nitrogen Compounds 6. Relationships between molecular parameters in per-X-substituted bridged spermine derivatives and basicity constants $\Sigma\alpha R$ of substituents: X = Cl, OPh, spiro-[O(CH₂)₃O]_{0.5}, Ph, NPh, NC₄H₈, NHBut. Simon J. Coles, David B. Davies, Michael B. Hursthouse, Adem Kılıç, Thomas A. Mayer, Robert A. Shaw and Gönül Yenilmez Çiftçi, *Acta Cryst.*, **2004**, *B60*, 739-747.
332. Stereoisomerism in Pentaerythritol-Bridged Cyclotriphosphazene Tri-Spiranes: Spiro and Ansa 1,3-Propanedioxy Di-substituted Derivatives. Aylin Uslu, Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç and Robert A. Shaw, *Eur. J. Inorg. Chem.*, **2005**, 1042-1047.
333. The award of the title of “*Doctor Honoris Causa*” to Professor Robert A Shaw by Gebze Institute of Technology, 6 April 2005 and his response. Booklet published by Gebze Institute of Technology.
334. The chiral separation and CD characterisation of enantiomeric cyclotriphosphazene derivatives. Tam Bui, Simon J. Coles, David B. Davies, Alex F. Drake, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç, Robert A. Shaw and Serkan Yeşilot, *Chirality*, **2005**, *17*, 1-6.
335. Structural and stereogenic properties of spiro- and ansa-substituted 1,3-propanedioxy derivatives of a spermine-bridged cyclotriphosphazene. Simon J. Coles, David B. Davies, Robert J. Eaton, Adem Kılıç, Robert A. Shaw and Gönül Yenilmez Çiftçi, *Polyhedron*, **2006**, *25*, 953-962.
336. Competitive formation of spiro and ansa derivatives in the reactions of tetrafluorobutane-1,4-diol with hexachlorocyclotriphosphazene. A comparison with butane-1,4-diol. Serap Beşli, Simon J. Coles, David B. Davies, Robert J. Eaton, Adem Kılıç and Robert A. Shaw, *Polyhedron*, **2006**, *25*, 963-974.

- 337.** The structural and stereogenic properties of pentaerythritoxy-bridged cyclotriphosphazene derivatives: *spiro-spiro*, *spiro-ansa* and *ansa-ansa* isomers. Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç, Robert A. Shaw and Aylin Uslu, *Dalton Trans.*, **2006**, 1302-1312.
- 338.** Structural Investigations of Phosphorus-Nitrogen Compounds 7. Relationships between Physical Properties, Electron Densities, Reaction Mechanisms and Hydrogen-Bonding Motifs of $N_3P_3Cl_{(6-n)}(NHBu^t)_n$ Derivatives. Stewart W. Bartlett, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Hanife İbişoğlu, Adem Kılıç, Robert A. Shaw and İlker Ün. *Acta Cryst.*, **2006**, B62, 321-329.
- 339.** A Spiro to Ansa Rearrangement in Cyclotriphosphazenes. S. Beşli, S. J. Coles, D. B. Davies, M. B. Hursthouse, A. Kılıç and R. A. Shaw, 11th International Symposium on Inorganic Ring Systems, P-31, Oulu, Finland, **2006**.
- 340.** Comparison of NMR and HPLC Characterisation Cyclophosphazenes Containing One or Two Centres of Chirality: Dibenzylamino Derivatives. A. Uslu, S. Beşli, D. B. Davies, A. Kılıç, Robert A. Shaw, Ş. Şahin and S. Yeşilot. 11th International Symposium on Inorganic Ring Systems, P-107, Oulu, Finland, **2006**.
- 341.** Stereogenic Properties of Spiranes Combined with Two Equivalent Conventional Centres of Chirality. D. B. Davies, S. J. Coles, M. B. Hursthouse, A. Kılıç, Ş. Şahin, R.A. Shaw and A. Uslu. 11th International Symposium on Inorganic Ring Systems, 77, Oulu, Finland, **2006**.
- 342.** Comparison of high-performance liquid chromatography of cyclotriphosphazenes derivatives with one or two equivalent stereogenic centres. Serap Beşli, David B. Davies, Adem Kılıç, Robert A. Shaw, Şule Şahin, Aylin Uslu and Serkan Yeşilot *Journal of Chromatography A*, **2006**, 1132, 201-205.
- 343.** Dimorphism in 4,4,6,6-tetrachloro-2,2-(2,2-dimethylpropane-1,3-dioxy) cyclotriphosphazene and 6,6-dichloro-2,2:4,4-bis(2,2-dimethylpropane-1,3-dioxy)cyclotriphosphazene. Simon J. Coles, David B. Davies, Ferda Hacivelioglu, Michael B. Hursthouse, Hanife İbişoğlu, Adem Kılıç and Robert A. Shaw. *Acta Cryst.*, **2007**, C63, o152-o156.
- 344.** Stereogenic properties of spiranes combined with one or two equivalent conventional centres of chirality. Simon J. Coles, David B. Davies, Michael B. Hursthouse, Adem Kılıç, Şule Şahin, Robert A. Shaw and Aylin Uslu. *J. Organomet. Chem.*, **2007**, 692, 2811-2821.
- 345.** Stereogenic properties of spiranes combined with four equivalent conventional centres of chirality. Aylin Uslu, Simon J. Coles, David B. Davies, Robert J. Eaton, Michael B. Hursthouse, Adem Kılıç and Robert A. Shaw, *Dalton Trans.*, **2007**, 2040-2047.
- 346.** Characterisation of temperature-dependent phase transitions in 2,2-trimethylenedioxy-4,4,6,6-tetrachlorocyclotriphosphazene, $N_3P_3Cl_4[O(CH_2)_3O]$. Simon J. Coles, David B. Davies, Michael B. Hursthouse, Susanne L. Huth, Adem Kilic, Mark E. Light, Marianne Odlyha, John S. Rutherford, Robert A. Shaw and Aylin Uslu, *Chemistry Central Journal*, **2007**, 1:20 (18 July 2007).
- 347.** A spiro to ansa rearrangement in cyclotriphosphazene derivatives. Serap Beşli, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Adem Kılıç and Robert A. Shaw. *Dalton Trans.*, **2007**, 2792-2801.
- 348.** (4,4,6,6-tetrachloro-2-[(2,4-dimethylphenyl)thio]-N-[4-(2,2,4,4-tetrachloro-1,3,5,7,11-pentaaza-2 λ^5 ,4 λ^5 ,6 λ^5 -triphosphaspiro[5.5] undeca-1,3,5-trien-7-yl)butyl]-1,3,5, 2 λ^5 ,4 λ^5 ,6 λ^5 -triazatriphosphinin-2-amine. Simon J. Coles, David B. Davies, Michael B. Hursthouse, Hanife İbişoğlu, Adem Kılıç, Thomas A Mayer and Robert A. Shaw. *Acta Cryst.*, E, **2007**, 63, Part 9, o3753.

- 349.** Clathrate and channel inclusion systems co-exist in the crystal structure of a bis-C-pivot macrocycle ($Z' = 2$). Selen Bilge, Simon J. Coles, David B. Davies, Michael B. Hursthouse, Zeynel Kılıç, John S. Rutherford and Robert A. Shaw. *Cryst Eng Comm.*, **2008**, 10, 873-878.
- 350.** A *cis*-directing effect towards diols by an exocyclic P-NHR moiety in cyclotriphosphazenes. Serap Beşli, Simon J. Coles, David B. Davies, Adem Kılıç, Elif Okutan, Robert A. Shaw, Esra Tanrıverdi and Gönül Yenilmez Çiftçi, *Inorg. Chem. Comm.*, **2009**, 12, 773-777.
- 351.** X-ray crystal structures of chiral spermine-bridged cyclophosphazenes. Y. Zorlu, G. Y. Çiftçi, S. J. Coles, M. B. Hursthouse, D. B. Davies, R. A. Shaw and A. Kılıç. *Acta Cryst.* **2009**. A65, s277.
- 352.** Stereochemical and Spectroscopic Properties of Methanol and 1,3-Propanediol Derivatives of 2,2-(N-Methyl-1'3'-diaminopropane)-4,4,6,6-tetrachlorocyclotriphosphazatriene. E. Okutan, G. Y. Ciftci, E. Tanreverdi, A. Kilic, D. B. Davies, R. A. Shaw, S. J. Coles, 11th *JCF-Frühjahrssymposium*, 03/2009.
- 353.** 2,2,3,3-Tetrafluoro-1,4,-Butanediol Derivatives of 2,2-(N-Methyl-1'3'-diaminopropane)-4,4,6,6-tetrachlorocyclotriphosphazatriene and their biological activities. E. Okutan, G. Y. Ciftci, E. Tanreverdi, K. Buruk, A. Kilic, D. B. Davies, R. A. Shaw, S. J. Coles, 11th *JCF-Frühjahrssymposium*, 03/2009.
- 354.** A *cis*-directing Effect towards Diols by an Exocyclic P-NHR Moiety in Cyclotriphosphazenes. Esra Tanrıverdi Ecik, Serap Besli, Simon J. Coles, David B. Davies, Adem Kilic, Elif Okutan, Robert A. Shaw, Gonul Yenilmez Ciftci. 12th *JCF-Frühjahrssymposium*, 01/2010.
- 355.** Refugees in far-away places. Robert A. Shaw, *AJR Journal*, **2010**, vol. 10, No 9, p5.
- 356.** Competitive formation of *cis*- and *trans*-derivatives in the nucleophilic substitution reactions of cyclophosphazenes having a mono-spiro P-NHR group. Serap Beşli, Simon J. Coles, David B. Davies, Adem Kılıç, Elif Okutan, Robert A. Shaw, Esra Tanrıverdi Eçik and Gönül Yenilmez Çiftçi, *Dalton Trans.*, **2011**, 40, 4959-4969.
- 357.** Bridged Cyclophosphazenes Resulting from Deprotonation Reactions of Secondary Amino Derivatives. Serap Beşli, Simon J. Coles, David B. Davies, Adem Kılıç and Robert A. Shaw. *Dalton Trans.* 2011, **40**, 5307-5315.
